(Manuscript received June 2003)

---

### **Abstract**

This work included the survey of Families Aleyrodidae(11), Coccidae (7), Halimococcidae (1), Lecanodspididae (1), Phoenicococcidae (1), and Pseudococidae (4) (Homoptera) and their parasitoids in Aswan Governorate during 2001-2002. Forty one species of these pests were recorded as well as hosts, distribution and parasitoids of the species were given. Twenty parasitoids species were recorded attacking the mentioned pests. Diaspidis is the largest group in Aswan Governorate, followed by the aleyroidids.

### **INTRODUCTION**

Climatic factors has an ultimate determining role in the distribution and abundance of organisms (Huffaker *et al.*, 1984). It also greatly influences (and at least restricts) the distribution and abundance of animal and plant populations (Huffaker and Gutierrez, 1990). Aswan Governorate characterized by special weather condition which reflects on fauna and flora of this location (Abd-Rabou, 1998). The present work dealt with the collected material from whiteflies (Aleyrodids), armored scale insects (Diaspidids), soft scale insects (Coccids), pseudomealybugs (Pseudococcids) and their parasitoids in different locations in Aswan Governorate during 2001-2002.

### **MATERIALS AND METHODS**

A survey was carried out all over Aswan Governorate during 2001-2002. Infested host plants with any of the prospective insect groups were examined in the field, using a pocket lens. Leaves from different host plants were collected and placed

separately in paper bags for further examination in the laboratory. Identification of aleyrodids, coccids, diaspidids and pseudococcids and other scale insect families were made by examining their pupal case and mounted adults in Canada balsam, according to Bink-Moenen (1983). Materials were also kept in a well-ventilated container until the emergence of any parasitoids. Identification of parasitoids was made by examining their mounted adults in Hoyer' s medium (Noyes, 1982).

## **RESULTS AND DISCUSSION**

Whiteflies (Aleyrodidae), armored scale insects (Diaspididae), soft scale insects (Coccidae), pseudomealybugs (Pseudococcidae) and their parasitoids at different locations in Aswan Governorate during 2001-2002, are presented in Table 1.

During the present work forty one species of aleyrodids, coccids, diaspidids, halimococcids, lecanodiaspidids, phoenicococcids and pseudococcids and other scale inscets families were collected from Aswan Governorate. Bink -Moenen (1983) recorded 6 species of whiteflies from Aswan. Later, Abd-Rabou (1997) added two new recorded species from the same Governorate. While Mohammed and Nada (1991) recorded two species from soft scale insects. Priesner and Hosny (1940) recorded three parasitoid species from Aswan attacking some species of these pests. While in the present work twenty two of parasitoids species were collected.

Table 1. Aleyrodids, coccids, diaspidids and pseudococcids and their parasitoids

Family	Species	Common Name	Host Plants	Locations	Recorded Parasitoids
I. Aleyrodidae	1. <i>Acaudaleyrod-es citri</i> Priesner & Hosny)	The black alurodid	<i>Acacia</i> sp., <i>Acacia tortilis</i> , <i>A. nilotica</i> , <i>Alhagi mauromum</i> , <i>Leptadenia heterophylla</i>	Kom Ombo, El-Deka and Selwa; Idfu, El-Ramady; Aswan city, Elefantine Island and El-Aaqab	None
	2. <i>Aleurocanthus zizyphi</i> Priesner	Nabkh whitefly	<i>Balanites aegyptiaca</i> , <i>Zizyphus spina-christi</i>	Aswan city, Elefantine Island and Kom Ombo, Korta	<i>Encarsia lutea</i> (Masi).
	3. <i>Aleurolobus niloticus</i> Priesner & Hosny	Mignonette whitefly	<i>Balanites</i> sp., <i>B. aegyptiaca</i> , <i>Lawsonia inermis</i> , <i>Ficus sycamorus</i> , <i>Z. spina-christi</i>	Idfu, El-Tonab; Kom Ombo, El-Kagog; Aswan city, El-Aaqab and Abu Simbil	<i>Encarsia elegans</i> Masi.

Table 1. Con't

Family	Species	Common Name	Host Plants	Locations	Recorded Parasitoids
	4. <i>Aleurotuerkulatus porosus</i> (Priesner & Hosny)	Porosus nebkh whitefly	<i>Z. spina-christi</i>	Kom Ombo, Korta	None
	5. <i>Aleuroplatus acacia</i> Bink-Moenen	Sunt whitefly	<i>A. nilotica</i>	Aswan city, Elefantine Island	None
	6. <i>Bemisia afer</i> (Priesner & Hosny)	Sycamore whitefly	<i>A. nilotica</i> and <i>Albizia</i> sp.	Kom Ombo, El-hegadya and El-Kagog	<i>Encarsia davidi Viggiani</i> , <i>E. lutea</i> , <i>Eretmocerus corni</i> Haldeman, <i>E. mundus</i> (Mercet).

Table 1. Con't

Family	Species	Common Name	Host Plants	Locations	Recorded Parasitoids
	<i>Bemisia (tabaci complex) (Genn.)</i>	Cotton whitefly	<i>Acacia</i> sp., <i>A. tortilis.</i> , <i>Althaea</i> sp., <i>Bauhinia</i> sp., <i>Cucumis sativus</i> , <i>Hellanthus annus</i> <i>Lantana camara</i> , <i>Lathyrus articulatus</i> , <i>Lotus arabicus</i> <i>Lycopersicum esculentum</i> , <i>Malva rotundifolia</i> , <i>M. sylvestris</i> , <i>Parkinsonia aculeeata</i> , <i>Saccharum officinarum</i> , <i>Withania somnifera</i>	Kom Ombo, El-Rakawa, Selwa, Korta, El-Kagog and El-Aqilate; Idfu, El-Rdisya, El-Sebaya and El-Tonab; Daraw, El-Gaafera and El-Retay; Aswan city, El-Aaqab	<i>Encarsia davidi Viggiani</i> , <i>E. lutea</i> , <i>Eretmocerus corni Haldeman</i> , <i>E. mundus</i> (Mercet).

Table 1. Con't

Family	Species	Common Name	Host Plants	Locations	Recorded Parasitoids
	8. <i>Dialeurodes kirkaldyi</i> (Kotinsky)	Jasmine whitefly	<i>M. rotundifolia</i>	Daraw, El-Retay	None
	9. <i>Ramsesseus folioti</i> Zahradink	Egyptian whitefly	<i>M. rotundifolia</i>	Aswan city Elefantine Island	<i>Encarsia ramsesi</i> Polaszek and <i>Eretmocerus</i> sp
	10. <i>Siphoninus phillyreae</i> (Hal.)	Pomegranate whitefly	<i>Punica granatum</i>	Aswan city, Elefantine Island	<i>Encarsia inaron</i> (Walker).
	11. <i>Tetraleurodes leguminicola</i> Bink-Moenen	Leguminous whitefly	<i>A. nilotica</i>	Aswan city, Elefantine Island	<i>Encarsia acaudaleyrodis</i> Hayat, <i>E. davidi</i> , <i>E. ramsesi</i> and <i>Euderomphale</i> sp.

Table 1. Con't

Family	Species	Common Name	Host Plants	Locations	Recorded Parasitoids
II. Coccidae	1. <i>Ceronomia africana</i> Macfie	African wax scale	<i>Ficus nitida</i>	Kom Ombo, Korta	None
	2. <i>Coccus hesperidum</i> L.	Brown soft scale	<i>Bambusa</i> sp.	Aswan city, El-Aaqab	<i>Diversinervus elegans</i> Silvestri.
	3. <i>Parasaissetia nigra</i> (Nietner)	Niger soft scale	<i>F. scaymours</i>	Kom Ombo, El-Ramady	<i>Paraceraptercerus africanus</i> Girault
	4. <i>Putvinaria tenuivalvata</i> (Newstead)	Sugar cane soft scale	<i>S.officinarum</i>	Nasr El-Noba, Dar El-Salam	<i>Coccophagus scutellaris</i> (Dalman)
	5. <i>Saissetia coffeae</i> (Walker)	Hemispherical soft scale	<i>Ficus nitida</i>	Kom Ombo, El-Kagog	None

## الذباب الأبيض والحشرات القشرية الرخوة والمسلحة والبق الدقيقي وطفيليياتهم في محافظة أسوان

شعبان عبد رب

معهد بحوث وقایة النباتات - مركز البحوث الزراعية - الدقى - جيزه - مصر

تم فى هذا العمل حصر للذباب الأبيض والحشرات القشرية المسلحة والحشرات القشرية الرخوة والبق الدقيقي والطفيلييات المصاحبة لهم بالإضافة إلى العوائل النباتية والتوزيع الجغرافي لهذه الأنواع في محافظة أسوان أثناء الفترة من ٢٠٠١-٢٠٠٢. وقد أظهرت النتائج أن محافظة أسوان بها ٤٢ نوعاً من هذه الآفات مصاحبة لها ٢٢ طفيل.
