

ABSTRACT

Maha Ahmed Mahmoud Ahmed Tantawy. Certain Approaches to control the key pests infesting some sweetpea cultivars.

Unpublished Ph.D. Dissertation, Ain Shams University, Faculty of Agriculture, Department of Plant Protection, Egypt, 2006.

Field studies were conducted throughout two seasons at Qalubiya Governorate to survey of pests and natural enemies of sweetpea plants, *Pisum sativum var. macrocarpon*, and studied the effect of weather factors, planting date and space, sweetpea cultivars (6 cultivars), biofertilizer compounds and biochemical and chemical compounds on the population densities of thrips, aphids, whitefly (eggs and nymphs) and leafminers (larvae + pupae). The obtained results clearly showed that 48 species belonging to 42 genera and 31 families of eleven orders occurred on sweetpea plants. The population densities of the considered insects were greatly influenced according to the changes in weather factors (maximum and minimum temperature and relative humidity). Sweetpea plants which planted at the earliest planting date (Oct. 30th) and largest distance (40 cm) had less infestation with the various considered insects. Dregon cultivar was the most susceptible one to the infestation with the various considered insects. Sweetpea plants treated with biofertilizer compounds, Activator and Stimoful harboured the least number of these insect pests. The biocompound, Spinosad gave good reduction percentages of thrips, aphids and leafminers while *B. thuringiensis*, *B. bassiana* and Soybean oil gave considerable reductions more than 50 % after 3 days.

Key words: Sweetpea plants, *Pisum sativum* var. *Macrocarpon*, Thrips, Aphids, Whitefly, Leafminers, Planting date, Planting space, Susceptibility of sweetpea cultivars, Biofertilizers, Biocompounds.

I. INTRODUCTION.....	1
II. REVIEW OF LITERATURE.....	3
1. Survey of pests infesting sweetpea plants.	3
2. Seasonal abundance of certain sweetpea insect pests.....	6
3. Effect of planting dates on the infestation rates of certain sweetpea pests.....	10
4. Effect of planting spaces on the population densities of some insect pests infesting sweetpea plants.....	15
5. Susceptibility of different sweetpea varieties to infestation degree of certain pests.....	17
5.1. Correlation between phytochemical components of sweetpea leaves and infestation rates with some pests.....	22
5.2. Correlation between anatomical characters of sweetpea leaves and infestation rates with some pests	27
6. Effect of the biofertilizer compounds on the population density of certain pests infesting sweetpea plants.	28
7. Efficiency of different insecticides against some insect pests infesting sweetpea plants.	31
III. MATERIAL AND METHODS.....	39
1. Survey of pests infesting sweetpea plants and their natural enemies.....	39
2. Seasonal abundance of certain insect pests infesting sweetpea plants.	40
3. Effect of planting dates on the infestation of certain sweetpea insect pests.....	41
4. Effect of planting space on the infestation of sweetpea pests.	41
5. The susceptibilities of different sweetpea cultivars to the infestation of certain insects.	41

5.1. Field studies	41
- Sampling technique in the previously mentioned four field experiments..	42
5.2. Laboratory studies	43
5.2.1. Analysis of phytochemical components of leaves of the tested sweetpea cultivars	43
5.2.2. Anatomical characters of the tested sweetpea cultivars' leaves.....	43
6. Effect of biofertilizer compounds on the population density of thrips, aphids and leafminers infesting sweetpea plants.....	44
7. Efficiency of different biocompounds against thrips, aphids and leafminers on sweetpea leaves.....	45
8. Statistical analysis.....	48
IV. RESULTS AND DISCUSSION.....	49
1. Survey of insect and mite pests infesting sweetpea plants, <i>Pisum sativum</i> (Toledo sugar), and their natural enemies in Qalubiya Governorate.....	49
2. Seasonal abundance of certain insect pests inhabiting sweetpea plants.....	59
2.1. Thrips (<i>Thrips tabaci</i>)...	60
2.2. Aphids (<i>Aphis craccivora</i> , <i>Myzus persicae</i> and <i>Acyrthosiphon pisum</i>).....	66
2.3. Whitefly (<i>B. tabaci</i> , immature stages).....	68
2.4. Leafminers (<i>Liriomyza trifolii</i> and <i>Chromatomyia horticola</i>).	71
3. Effect of planting dates on the population densities of certain sweetpea pests.....	75
3.1. Pests infesting sweetpea leaves.....	75
3.1.1. Thrips (<i>Thrips tabaci</i>).....	75

3.1.2. Aphids (<i>Aphis craccivora</i> , <i>Myzus persicae</i> and <i>Acyrthosiphon pisum</i>).....	78
3.1.3. Whitely (<i>Bemisia tabaci</i>).....	81
3.1.3.1. Eggs.....	81
3.1.3.2. Nymphs.	84
3.1.4. Leafminers (<i>Liriomyza trifolii</i> and <i>Chromatomyia horticola</i>).....	87
3.2. Pests infesting sweetpea flowers.....	90
3.2.1. Thrips (<i>Thrips tabaci</i>).....	90
3.2.2. Aphids (<i>Myzus persicae</i> and <i>Acyrthosiphon pisum</i>).	93
4. Effect of planting spaces on the population density of some pests infesting sweetpea plants.....	98
4.1. Pests infesting sweetpea leaves.....	98
4.1.1. Thrips, <i>Thrips tabaci</i> (nymphs + adults)....	98
4.1.2. Aphids (<i>Aphis craccivora</i> , <i>Myzus persicae</i> and <i>Acyrothosiphon pisum</i>)...	102
4.1.3. Whitely (<i>Bemisia tabaci</i>).....	105
4.1.3.1. Eggs.....	105
4.1.3.2. Nymphs.....	108
4.1.4. Leafminers (<i>Liriomyza trifolii</i> and <i>Chromatomyia horticola</i>) (larvae + pupa).....	111
4.2. Pests infesting sweetpea flowers.....	114
4.2.1. Thrips (<i>Thrips tabaci</i>).....	114
4.2.2. Aphids (<i>Myzus persicae</i> and <i>Acyrthosiphon pisum</i>).....	117
5. The Susceptibility of different sweetpea cultivars to the infestation of some insects.....	121
5.1. Insect infesting sweetpea leaves.....	122
5.1.1. Thrips, <i>Thrips tabaci</i> (nymphs + adults).....	122
5.1.2. Aphids.....	125
5.1.3. Whitefly, <i>Bemisia tabaci</i>	128

5.1.3.1. Eggs.....	128
5.1.3.2. Nymphs.....	131
5.1.4. Leafminers.....	135
5.2. Insects infesting sweetpea flowers.....	138
5.2.1. <i>Thrips tabaci</i>	138
5.2.2. Aphids.....	141
5.3. The amount percentages of certain phytochemical components in the leaf of the different sweetpea cultivars and their relation to the infestation of certain insects.....	147
5.3.1. <i>Thrips, T. tabaci</i>	147
5.3.2. Aphids, <i>Aphis craccivora</i> , <i>M. persicae</i> and <i>A. pisum</i>	150
5.3.3. Whitefly, <i>B. tabaci</i>	152
5.3.3.1. Eggs.....	152
5.3.3.2. Nymphs.....	154
5.3.4. Leafminers, (<i>L. trifolii</i> and <i>C. horticola</i>).....	156
5.4. The anatomical characters of five tested sweetpea cultivars and common pea cultivar in relation to their infestation with certain insects.....	159
5.4.1. <i>Thrips, T. tabaci</i> (nymphs +adults).....	160
5.4.2. Aphids (<i>Acyrthosiphon pisum</i> , <i>Myzus persicae</i> and <i>Aphis craccivora</i>).....	162
5.4.3. <i>B. tabaci</i> nymphs.....	164
5.4.4. Leafminers (<i>Liriomyza trifolii</i> and <i>Chromatomyia horticola</i>).....	164
6. Effect of the biofertilizer compounds on the population density of certain insect pests infesting sweetpea plants.....	168
6.1. <i>Thrips, Thrips tabaci</i> (nymphs + adults).	168
6.2. Aphids (<i>Aphis craccivora</i> , <i>Myzus persicae</i> and <i>Acyrthosiphon pisum</i>).....	172

6.3. Whitefly, <i>Bemisia tabaci</i>	176
6.3.1. Eggs.....	176
6.3.2. Nymphs.....	179
6.4. Leafminers (<i>Liriomyza trifolii</i> and <i>Chromatomyia horticola</i>).....	183
7. Efficiency of different biocompounds against certain insects infesting sweetpea leave plants.....	188
7.1. Thrips.....	189
7.1.1. First spray.....	189
7.1.2. Second spray.....	192
7.2. Aphids.....	195
